

BIOLASE, TeamSmile and Los Angeles Chargers to Host Oral Health Program for Children at Gerald P. Carr Intermediate School

The Los Angeles Chargers Girls will also be visiting to help bring awareness to this community-driven initiative

LOS ANGELES and SANTA ANA, Calif., Jan. 3, 2019 /PRNewswire/ -- [BIOLASE, Inc.](#) (NASDAQ: BIOL), the global leader in dental lasers, and [TeamSmile](#), the nation's premier advocacy group that supports life-changing dental care for underserved children and the Chargers announced today that nearly 300 students at [Gerald P. Carr Intermediate School](#) will be given free access to advanced dental care. The program will take place on Friday, Jan. 18 from 9:00 a.m. to 3:00 p.m., with special appearances by the Charger Girls.

This incentive is one of several partnership programs that BIOLASE has ventured into with nonprofit organizations to educate families on the minimally-invasive, gentler dental experience a [Waterlase dentist](#) can offer. At the program, students will receive free screenings and preventive care, and if needed, the children will receive radiographs and laser treatments onsite.

"Using the power of professional sports organizations, TeamSmile creates a fun day which gets children excited about dental care. We call it a TeamSmile dental tailgate party" said TeamSmile Executive Director, John McCarthy. "We value this new partnership with BIOLASE, which provides us the opportunity to demonstrate pain-free care. We're offering children memories and an education component that can last a lifetime."

BIOLASE and TeamSmile have continued this momentum of the program since working together on their first program with the Chargers in [2018](#). The organizations are already planning another program slated for Feb. 4, 2019 to continue efforts in the Dallas area.

"Few things say 'don't fear the dentist' like being able to receive treatment and then get an autograph from a Charger's alumni," said BIOLASE CEO Todd Norbe. "Dental care is a significant part of life, and one we want to educate children on at an early-age – instilling good habits and positive experiences. Because our dental lasers offer less invasive solutions, we're able to foster a healthy environment, free of fear, pain and anxiety."
